DeepThink

The Enterprise AI Platform

Connect. Think. Automate. Govern.

Empowering enterprises to adopt AI securely, rapidly, and at scale.

DeepThink transforms disconnected enterprise systems into a unified AI ecosystem.
By connecting your business data, orchestrating intelligent AI agents, automating enterprise workflows, and providing centralized AI governance, DeepThink enables organizations to make faster decisions and unlock greater operational efficiency—all from a single platform.

 **Connect your enterprise.**

 **Deploy intelligent AI.**

 **Govern with confidence.**

Why AI Adoption Stalls

Most organisations don't have an AI problem.
They have an adoption problem.

- 🎯 **No Strategy**
- 👥 **Skills Gap**
- 🧪 **Random Experiments**
- 🔗 **Disconnected Data**

DeepThink provides the strategy, platform, and expertise to help organisations become AI-first.

The DeepThink AI Acceleration Framework

A consulting-led approach to becoming an AI-first organisation — rapidly, safely, and with measurable business impact.

We don't start with technology. We start with your business.

1 Discover

- C-level workshops
- AI vision & priorities
- Success metrics

2 Assess

- Staff interviews
- Process mapping
- Data & systems review

3 Prioritise

- AI opportunity map
- Quick wins vs big bets
- ROI recommendations

4 Deploy

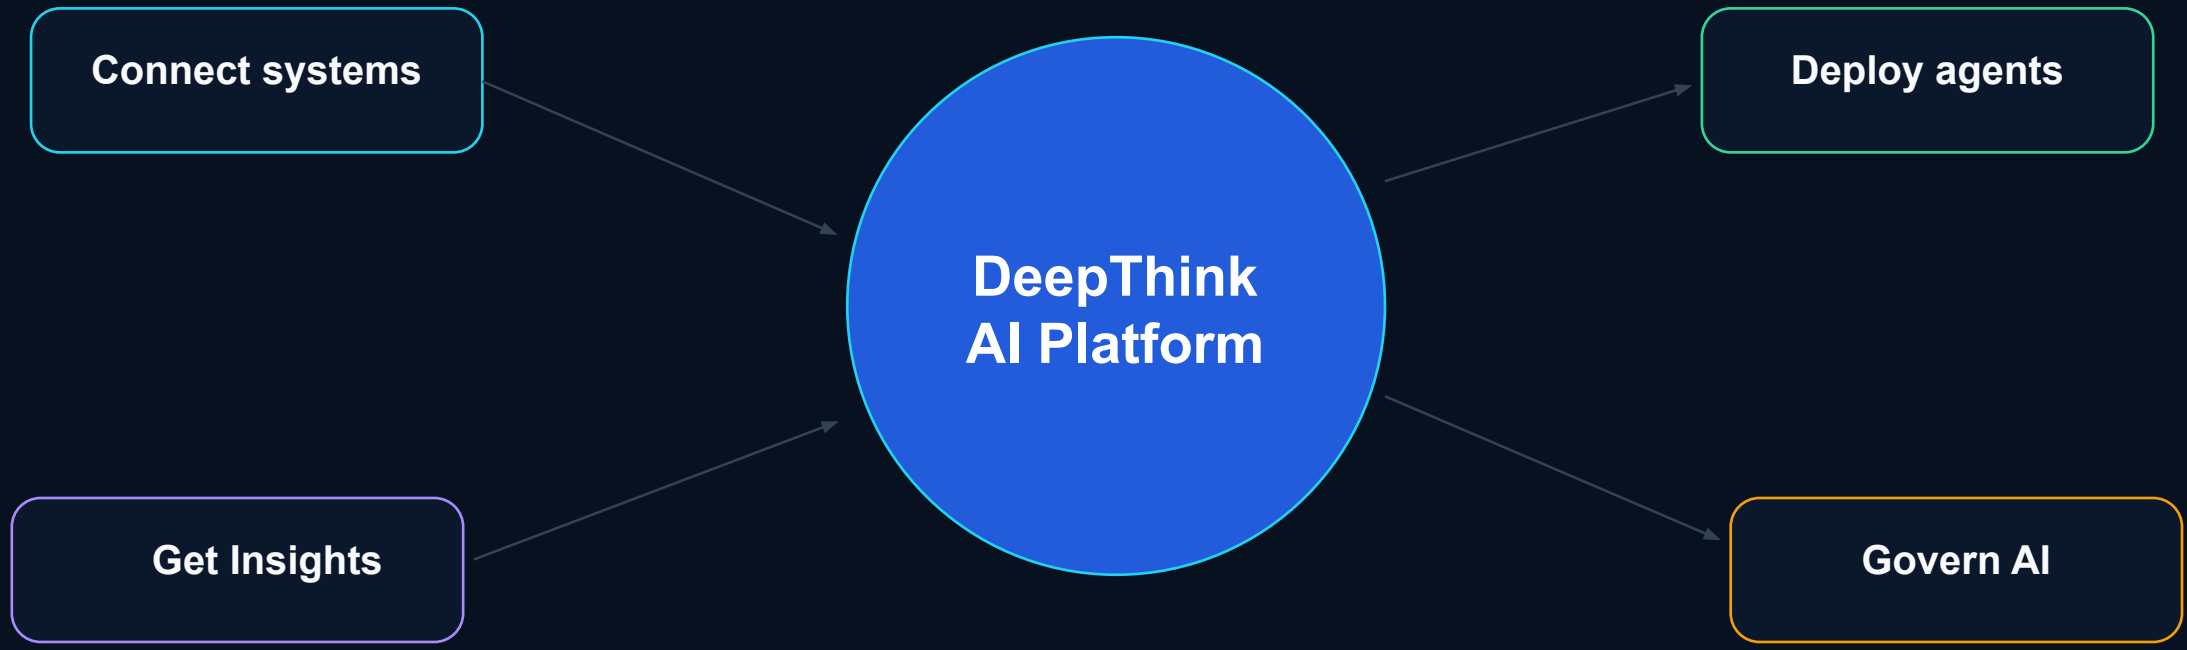

- Platform integration
- AI agents & automations
- Enablement & training

5 Optimise

- Usage analytics
- Governed feedback loops
- Scale AI-first culture

Meet DeepThink

One platform for enterprise AI adoption — integration, intelligence, automation, and governance.

Connect Your Business

DeepThink securely integrates with the systems companies already run — no rip-and-replace required.

- ERP
- CRM
- Finance
- HR
- Data Warehouse
- Microsoft 365
- Google Workspace
- SharePoint
- Email
- Documents
- APIs
- Custom Apps

One intelligent source of truth

Ask Your Business Anything

From executive questions to operational analysis, DeepThink retrieves, analyses, and explains answers in seconds.

CEO asks

“What was our best-performing product over the last six months, and why?”

No dashboard hunting. No report queue. No technical interface.

DeepThink returns

- Answer with evidence
- Relevant charts and narrative
- Source traceability
- Next-best recommendations

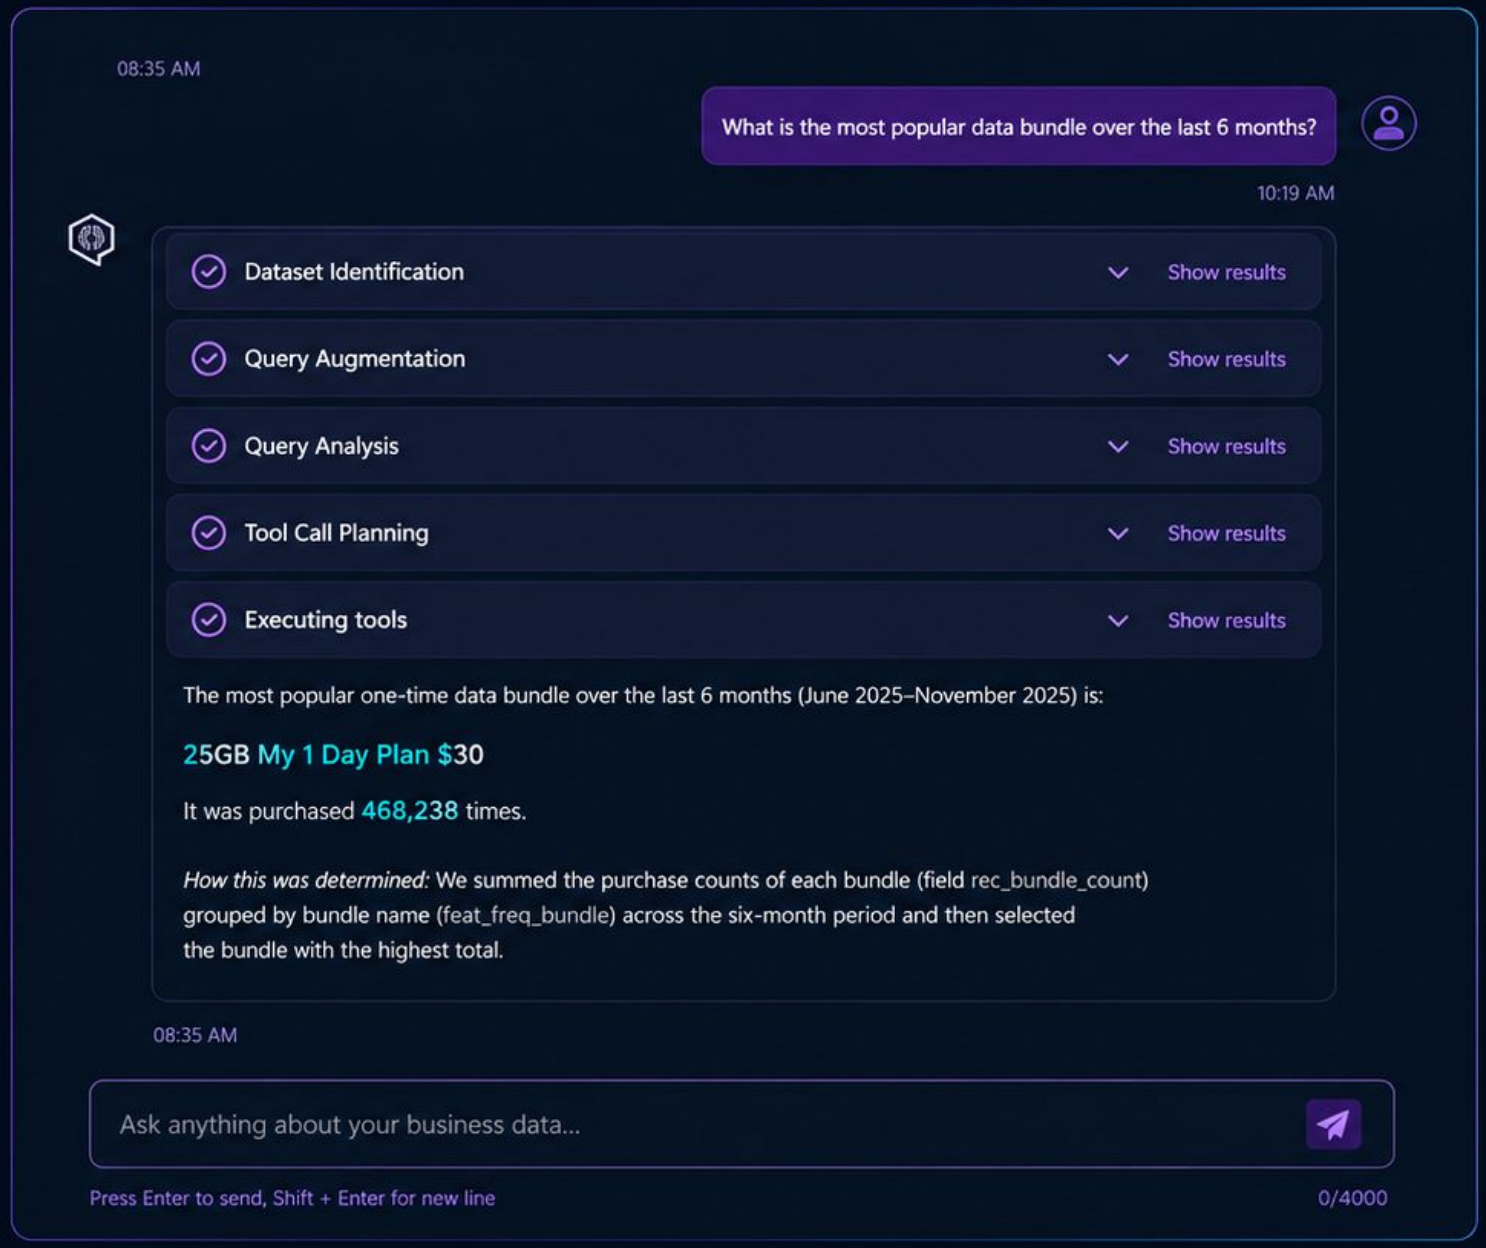

Unlock Insights Instantly

DeepThink continuously analyzes organisational data for:

01 | Emerging trends

02 | Anomalies

03 | Improvement opportunities

Build Your Digital Workforce

Deploy specialised AI agents that work alongside teams and understand enterprise context.

Withholding tax agent

Laws, treaties, withholding amounts

Corporate Sales Agent

Meeting prep, tailored decks, account research

Finance Analyst

Variance analysis, reporting, investigation

HR Assistant

Policies, onboarding, employee support

Churn detection

Trends, insights, proactive action

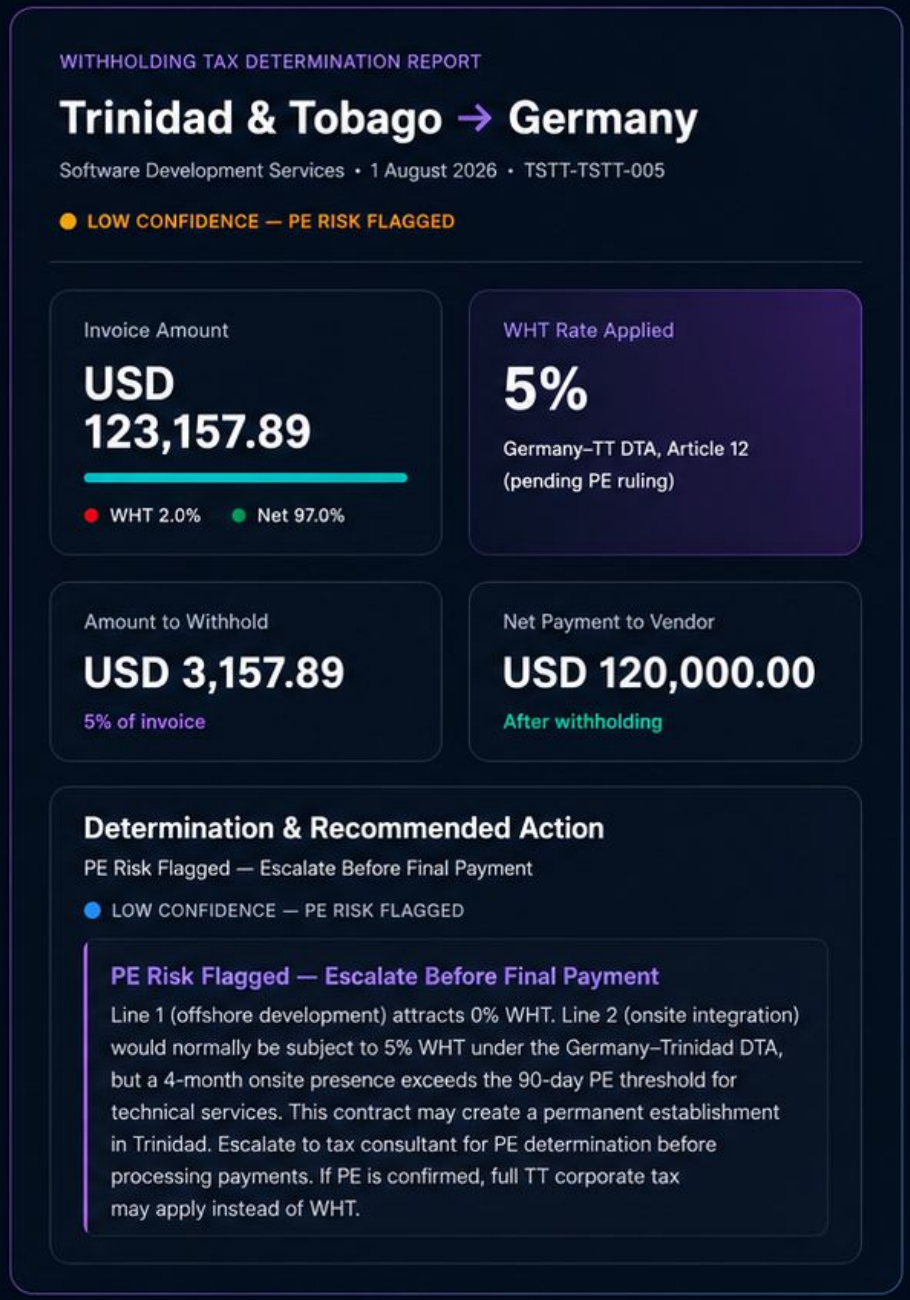

Operations Coordinator

Status checks, tasks, process automation

Custom agents can be created around your company’s workflows, data, and approval rules.

Do work with DeepThink – WHT Agent

Your AI assistant for withholding tax tasks – fast, accurate, and always compliant.

01

Upload a contract

Upload your contract and supporting documents.

02

Answer a few questions

The agent asks clarifying questions to understand the details.

03

Work out withholding tax treatment

DeepThink calculates the WHT treatment and provides a clear recommendation.

Enterprise Governance Built In

Enterprise AI requires more than intelligence. It requires control, visibility, and accountability.

Security & access

Role-based permissions and permission-aware responses.

Traceability

Audit trails, source references, and data lineage.

Cost visibility

Usage analytics, token monitoring, and model cost tracking.

Human control

Approval workflows for sensitive or high-impact actions.

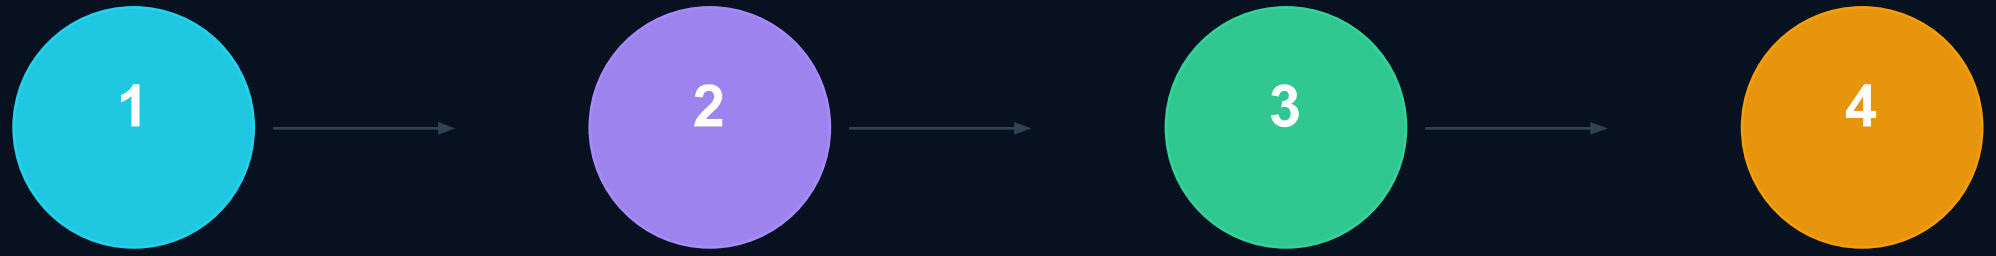

Central management

Consistent policies across agents, users, and systems.

AI you can trust — and prove.

AI That Evolves With Your Business

DeepThink agents improve through governed feedback and approved organisational learning.

Act

Use pre-trained agent and refine via prompts

Learn

Approved processes, preferences, and context

Improve

Better recommendations and reduced repetition

Govern

Controls, auditability, and human oversight

Smarter AI. Better outcomes. Within enterprise controls.

DeepThink

Why DeepThink?

Move beyond generic AI tools to enterprise-grade AI execution

THE OLD WAY	THE NEW WAY
Generic answers	Enterprise-specific intelligence
Requires manual prompting	Structured workflows + AI agents
No business context	Connected to your systems and data
Insights only	Insights + execution
Fragmented tools	One integrated AI platform
Difficult to scale securely	Enterprise-ready governance and security
Relies on technical users	Natural language for every team
Experiments and pilots	Operational AI at scale

DeepThink

Real Business Impact—Fast

Quantified outcomes

Search time down: Information lookup effort can fall materially, allowing employees to spend more time on higher-value work.

Manual work automated: A substantial share of repetitive workflows can be removed from human queues through intelligent automation.

Faster decisions: Real-time insight delivery can accelerate decision cycles by several multiples in active business functions.

Time-to-insight cut: The interval between asking a question and getting usable intelligence can shrink dramatically.

ROI in weeks: Organizations can realize measurable economic value quickly, improving the business case for scaling.

Why DeepThink?

Replace disconnected AI experiments with one implementation, one strategy, and one governed AI foundation.

Instead of buying separate solutions for:

- AI search
- Business intelligence
- Automation
- AI agents
- Workflow orchestration
- Governance and monitoring
- Enterprise integrations
- Consulting Services

Choose one Solution

DeepThink

The Future Isn’t More Software. It’s Smarter Work.

Imagine an organisation where every employee has AI, every department has agents, and every decision is backed by trusted intelligence.

Every employee has an AI assistant

Every department has intelligent agents

Every decision is powered by trusted data

Every process gets faster and smarter

This is the intelligent enterprise.
This is DeepThink.
